

Exercise: Even More Editing XML!!

January 2010

1 Adding metadata

Your document 'exercise2.xml' should be a well-formed and valid TEI XML document and contain all the minimum required components. Now let us look at adding some more metadata.

1. Replace the contents of `<publicationStmt>` with

```
<idno type="gutenberg">24357</idno>
<availability>
  <p>This text is freely available for re-use under US and UK law,
    consult your local legal restrictions if elsewhere.</p>
</availability>
```

to indicate the original catalogue number, and copying conditions.

2. Improve the `<sourceDesc>` by adding a `<bibl>` explaining where at least one of the texts came from:

```
<sourceDesc>
  <bibl>
    <title level="a">Progress</title>, <title level="j">Punch: or
      the London Charivari</title>, <date when="1914-07-01">July
        1, 1914</date>, 147, p. 1</bibl>
</sourceDesc>
```

3. Add a `<profileDesc>` after `<fileDesc>` and specify which languages you can see. at least:

```
<langUsage>
  <language ident="en">English</language>
</langUsage>
```

4. We can also have a text classification inside the `<profileDesc>`, something like

```
<textClass>
  <keywords scheme="DD">
    <term>English Humour</term>
    <term>Magazine</term>
  </keywords>
</textClass>
```

5. Finally, look at adding a `<revisionDesc>` after `<fileDesc>`, maybe

```
<revisionDesc>
  <change when="2009-04-15">
    <name>Your Name</name>
    <note>Say what you did</note>
  </change>
</revisionDesc>
```

to indicate when you edited the text

3 SAVE YOUR FILE!

2 Experiment!

Experiment with adding more to the `<teiHeader>`, seeing what the schema allows you to add. If you have any questions ask! But whatever you do, make sure its still valid TEI at the end!

3 Save your file!

Just a reminder to make sure you have saved your file before you finish! Perhaps save it as 'exercise3.xml'.
